

DAF/FAF Assistant for Windows

Pocket DAF/FAF Assistant for PDA

These software applications implement Delayed Auditory Feedback and Frequency-shifting Auditory Feedback techniques. The applications can be used by people who have stuttering problem to control their speech fluency and increase confidence level.

Our software is successfully used by many hospitals, speech rehabilitation centers, public and private schools, SLPs, and private customers. We are proud to provide our low cost, low maintenance, easy-to-use software solutions to our clients all over the globe.

REQUIREMENTS

The software application requires handheld computer running **Windows Mobile 2003** for Pocket PC or **Windows Mobile 5.0**.

For better performance the application requires external headphones and microphone (where available).

PRICE

Registered version of Pocket DAF/FAF Assistant Single User costs **\$69.95**; Pocket DAF/FAF Assistant Professional costs **\$89.95**

DAF/FAF ASSISTANT FOR WINDOWS

LIST OF FEATURES

Delayed auditory feedback (**DAF**) delays your voice to your ears a fraction of a second. The application provides delay range **from 40 to 220 milliseconds**. The delay increment step is 10 milliseconds. A short delay (50-80 milliseconds) almost instantly reduces stuttering without changing the speech speaking rate. A longer delay (90-220 milliseconds) makes you stretch your vowels and talk slower.

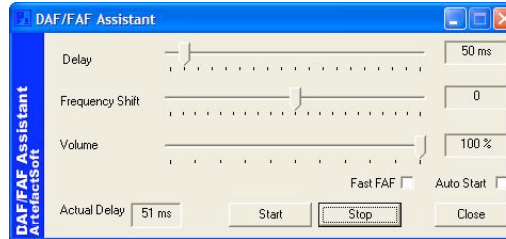

Frequency Altered Feedback (**FAF**) shifts the pitch of your voice. The application provides the pitch shift in the range **from one-half octave down to one-half octave up**. The FAF enhances the effectiveness of the application when is used simultaneously with DAF.

Additional frequency shifting algorithm (**Fast FAF option**). The standard FAF algorithm provides best sound quality but it requires a powerful processor. The Fast FAF option when enabled turns on the simplified frequency shifting algorithm that **can work better on less powerful computers**.

Easy to install, easy to use. The application provides installation program that creates all necessary icons and shortcuts on the computer desktop. The

graphical user interface is intuitive and easy to use.

The **free trial version** of the application can be downloaded and used for **up to 7 days**.

REQUIREMENTS

The software application requires Windows 95 (R), Windows 98 (R), Windows 2000 (R), Windows ME (R), Windows XP (R).

The software requires headphones and a microphone. It is recommended to use a headset combining headphones with a microphone.

PRICE

Registered version of DAF/FAF Assistant Single User costs **\$29.95**; DAF/FAF Assistant Professional costs **\$39.95**

DOCUMENTATION
